

Pharoah - Last Screen

Like the checkpoint screen, you want to land on platforms as soon as possible to prevent shots, however this is not always possible.

Mummy heads can fly forward at 3 angles, straight ahead, or high or low at about 30 degrees. Keep this in mind as you approach to avoid getting hit.

For the second mummy on the platform between pits, it might be faster to either turn left and "back-boost" through the mummy with i-frames, or slide directly into it to reduce knockback while otherwise ignoring it.
