

# Second Half

Still autoscrolling. Slide across the screen to trigger it.

You want to spend as little time as possible on the floating platforms that sink when you stand on them - they generate lag.

After the ring refill partway through the screen, switch to Pharaoh and hold a full charge over Mega Man's head for the rest of the stage. Use this to destroy the saturn enemies for free.

Be careful with the very last platform - if it and Mega Man are at the top row of tiles at the same time, it's possible for it to push Mega Man to the left.

The E-Tank at the end I think requires Balloon? It's not required for anything and there are multiple E-Tanks in the next stage. We suggest skipping this unless it is a specific goal to collect this E-Tank.
