

Triple Balloon Screens

Screen After Check Point

Up the ladder is where you usually switch to Dust in preparation for Square machine, using it to kill the Saturn enemy.

Triple Balloon Screen

There are two strats for the last ladder screen.

The first is the easiest strat - just hold up. It is faster overall across all stages (Balloon ammo problems).

The second is triple balloon, which climbs the screen fast, but uses too many balloons to be a viable time save. It still looks rad.

Final Screens

If you haven't already switched to Dust, switch to dust somewhere in here.
