Spring Man - General Movement Info

Spring Man's stage is full of...springs.

Holding jump will usually make Mega Man go higher when he bounces, whether it is a floor or a wall spring (ceiling springs will always push you down.

The red boxes near the end rotate as you jump on them.

Spring Screen 1 & 2

Screen 1

Is just an intro just slide to the left and move on

Screen 2

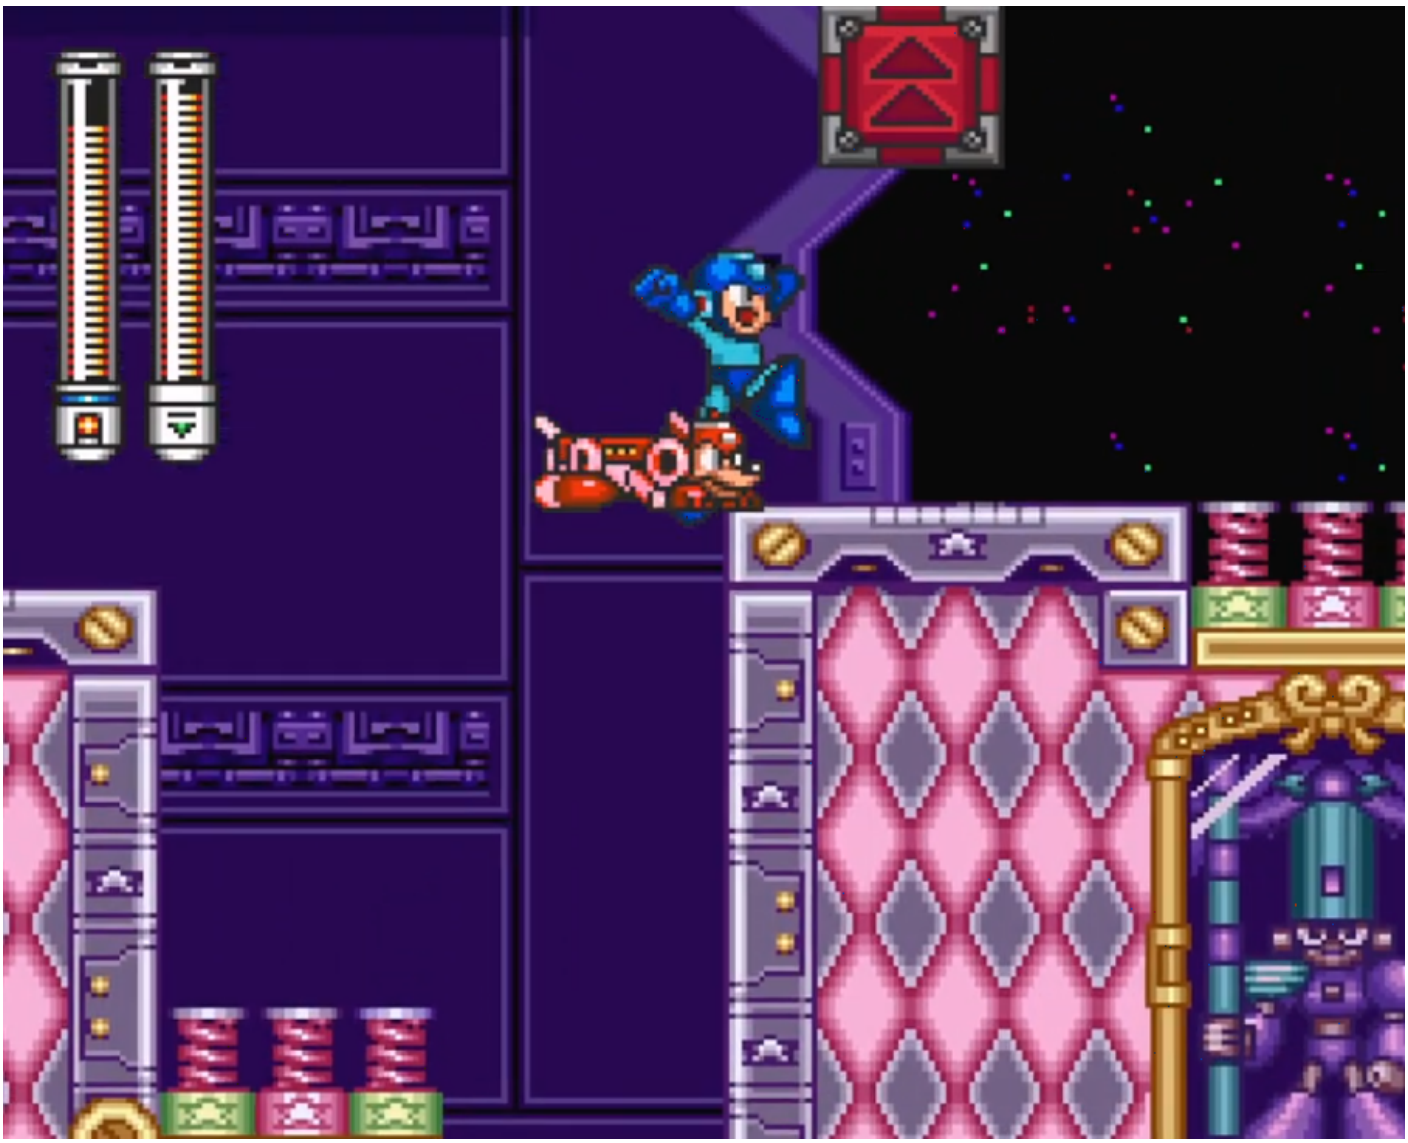

A lot of early Spring is a choice between using Junk to progress at the cost of lag, or using other weapons that are faster but potentially needing aim.

Spring Man - Large Room

> This Large Screen has Auto's Super Bolt! While only required for 100%, if you still need the shop for any% or are just playing casually, you may want to collect this item to improve the shop.

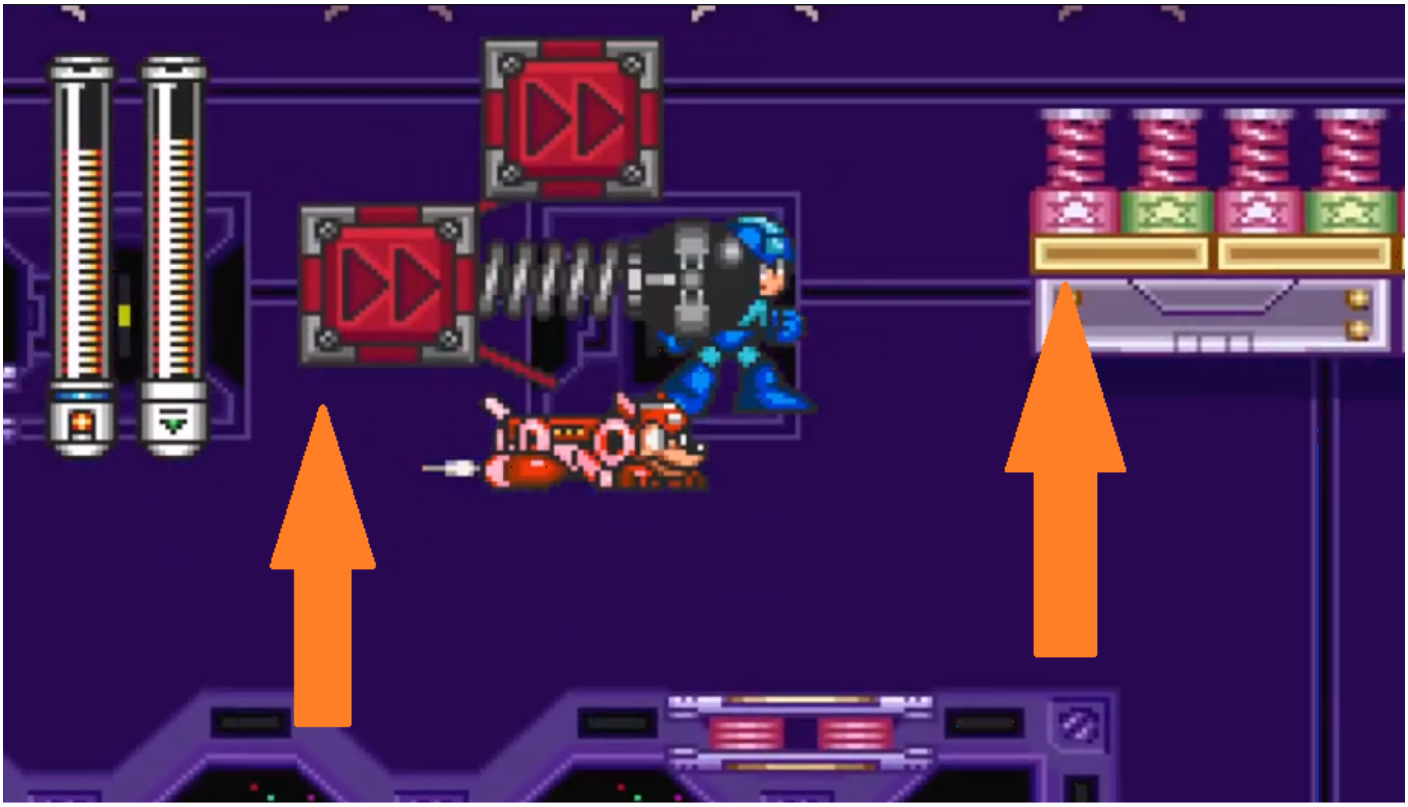

Any% To The Next Screen

At the start of the screen, use the low springs to reach the central platform, then summon Rush Jet on the far left. (It doesn't need to be the extreme left of this image, just mostly left)

Get on Rush and hold up (only up) from here, shooting the blue floating enemy.

When you pass the two boxes, jump to the little spring passage. (You can still make it if you get punched and look left at this height)

Jump up to the ladders and the last screen from there.

100% - Super Bolt

Instead of flying up and right in the room, navigate to the top left corner of the room.

You will need the Ref punchy blocks to break a wall to its left to access the Super Bolt's screen.

Boss - Spring Man

Spring Man is weak to Slash Claw.

Standard Fight

Immediately slide in and attack Spring Man with Slash Claw. This stuns Spring Man with a long set of iFrames and resets his attack sequence.

Spring Man will jump to the center of the room, then jump straight up. With good timing, you can jump and slash him just as his iframes run out (pictured above). The timing is somewhat tight but doable.

if you miss, Spring Man will throw two stretched out punches at you. Slide to avoid each, then use Slash on Spring as he comes down.

Repeat.

Quick Kill

It is possible to execute a Noise Crush Quick Kill on Spring Man in his stage. If you Have Noise Crush this should be attempted.

Other Fights

It is possible to fight Spring primarily with Noise Crush (this is an actual fight in refights, as opposed to the quick kill with Noise Crush)
