

# Intro - General Tips

Trees have 6 HP. They take 6 lemons, or 2 lemons plus a Mega Ball. They cannot be easily hit at point blank range, as Mega Man's arm goes through the tree before firing a shot.

Remember the Mega ball does the same damage whether kicked or fired directly into an enemy.

The fastest way through the last snail on the last slope is to slide into it to damage boost, then continue to slide through to the end. Be careful about the last treaded enemy - it's easy to get hit by it if you move forward before killing it.

You need at least 6 Mega Balls for the stage boss.
