Search - Part 2

> There is one bolt in this section, in the Thunder Claw grappling room over spikes. It is not needed in any%

Screen 1

Use Ice Wave as needed to clear a path, and slide through the screen. Mind the closing door near the end.

Screen 2 (Vertical Screen)

Tornado + Ball Jump up the ladder

> The Money Jump off the top platform is hard for 2 reasons - you have to jump before touching the spikes, and you have to fire something into the door to force it open. The wiggle from ball to buster to ball can feel weird.

Screen 3

Use Ice Wave and slide as much as possible. Supplement your ice waves with lemons against the rhinos.

Screen 4

Thunder claw to the left. You should be able to hit the peg without risking falling on the spikes.

> For 40 bolts, note the bolt is on this screen, requiring a second thunder claw peg.

Last Long Screen

Main Strat

Slide to the right immediately, going under the frogs and turning left to boost backwards. The rest of this screen is Ice Waves while sliding at speed with Hyper Slider. Keep in mine the gate near the end is over spikes and a thunder claw peg.

Alternate Strat

The last screen is long enough that Rush Bike is plausible. We believe it is slightly slower due to menu time and the hyper slider giving Mega Man reasonable speed, but some may find Rush Bike easier to use.
