Tengu Part 1 - General Tips

Mind the wind at your back. Going left against the wind is difficult. Ball jumping while facing left at the end of the bubble climb is near impossible.

> The first bolt in the stage is technically slower than others, but it's the fastest bolt not collected in any% if you need an extra one.

Bubble Climb

The first half's Bubble climb is simply alternating ball jumps left and right. Remember to jump and shoot to the right at the peak so the wind doesn't kill you. You won't be able to move left (against the wind) into your mega ball.
