

Pluto - Midboss Strats

The Pluto midboss is a drilling machine that can only be damaged on its "non-drill" side.

Tango Strat

WALK INTO THE SCREEN TRANSITION. The initial slide depends on the positioning of walking in, not jumping in. (Sliding might be okay too).

Equip Tango and hold charge, then neutral slide once. Release the Tango charge (to summon the cat) immediately after sliding and hold down.

The primary reason to use this strat is to save Neptune ammo, though it is very fast.

Neptune Strat

The Neptune strat is the classic one and easy to execute, but it uses 4 Neptune Ammo. Usually you'll want to save it, but it's possible Proto Man will just give you an S Capsule anyway.

Slide up and get 2 direct hits on the under side with Neptune. That's it, that's the strat.
