

Yammark 1 - Zero Glitch

In the regular All Stages speedrun route, you must have the Hyper Dash to acquire both the Sub Tank, and the Full Recover part from the reploid next to it.

There are other methods of reaching this platform, such as the Blade Armor's Upward Air Dash, that are not relevant to most categories.

Your goal early in Yammark's stage is to gain invincibility with Zero. This can be done on any of the bugs with platforms on their back.

The very first reploid in the stage has a Life Up part.

To reach the optional Sub Tank and Full Heal, dash-jump off the wall of the right side overhang. You need the Hyper Dasher to make this work.
