

Version Differences

The Legacy Collection 2 Version is preferred for this game for a multitude of reasons

- It loads significantly faster
- It allows easy selection of region/language-version (see below)

The US-English version should be avoided. Damage tables have the player deal less damage to mavericks.

- Japanese is generally fastest
- UK English has the better (for the player) damage table even with slower text, and should be played over US English if you want to read english text.
