

# Sigma Palace - Vile

There is one final Vile encounter, and he uses his Ride Armor here.

A three cycle fight is intended and simple, especially with ice, but you can defeat Vile in 2 cycles.

With Zero

1. use the triple slash to knock Vile off the Ride Armor
2. hit him with enough D. Glaive Swings to make him enter brief iframes twice
3. After the second set of iFrames, use Yeti's Ice attack
4. Repeat. Vile should die to the second ice attack.
  - **IF ON HARD< FINISH THIS FIGHT WITH X**
5. If Vile is still alive, just repeat. and use ice immediately after knocking him off the ride armor.

On Hard difficulty, Vile takes away the active character, making them unavailable to use. As such, do not end this fight with Zero on hard.
